

# WWII Bug Hunt

By Alpha (Jim Stadler)  
Units by Santa's Head (Craig Goodman)  
Some Scenery by Creation

This was Town Sweep but I didn't like the name and found a few things that needed fixing. So I listed it as version 1. If any bugs are found please E-mail me at [alpha@the37.com](mailto:alpha@the37.com).

The map has 4 meshes. Elim./Patrol/A-2/A-4.

Games are Assassin/Terries/Koth/Lmoth/STB/Body Count/CTF.

You need to use the Titans Plug to play. Made with Bungie's Fear and Loathing. Copy Right in Full or in Part to Bungie.

For a full list of my maps go to <http://enmasse.8m.com> there is information on my Hotline server there as well. All of my and most other WWII maps can be found there.

I hope you have fun playing this and all maps. Mine or other wise. Thanks to Santa's Head for the units that made Myth fun to play again. Thanks to 37 WHOOT! Special thanks to Gomer Plye for the help in beta testing all the times i needed it!
